RANCH
LIVE STOCK

The Animal Assist Gantry was designed with the animal and the operator's safety in mind. We heard too many stories of animals being injured during a rescue; we put our heads together in hopes to make a difference.

This gantry's 16" air casters are designed to be able to roll over any terrain. We understand accidents don't always happen in a convenient place. Adjustable heights and widths allow the gantry to be more flexible in different situations.

Worried we won't have exactly what you need? We would love to work with you to create a custom gantry for your specific needs.
