Custom Gantries Available!

With an extensive background in the rigging industry, EC&MW is an innovative company working on new ideas to prevail in the industry. EC&MW manufactured the first Air Pneumatic Gantry in 1998, the 6,000 pound capacity crane in 2000, and the 8,000 lb and removable leg in 2005. In addition to our standard A Frame models, we offer a wide variety of gantry cranes to suit your needs. We take pride in providing a top quality product that will supply you with years of dependable service. All manufacturing is done in-house allowing us to be responsive to our customer's needs.
